

PENNSYLVANIA POLICE PURSUITS

2024

ANNUAL REPORT

*Prepared by: Pennsylvania State Police
Bureau of Research and Development*

EXECUTIVE SUMMARY

The Pennsylvania Vehicle Code defines a pursuit as "an active attempt by a police officer operating a motor vehicle to apprehend one or more occupants of a motor vehicle when the driver of the vehicle is resisting the apprehension by maintaining or increasing his speed or by ignoring the police officer's audible or visual signal to stop." Since 1996, the Vehicle Code has required police departments in Pennsylvania to make a record of all vehicle pursuits and to report them to the Pennsylvania State Police (PSP).

Police officers in Pennsylvania reported a total of 2,863 pursuits in 2024. The following are noteworthy statistics taken from this report:

- 16 individuals were killed in relation to pursuits. Of the 16 fatalities, 12 were violators and four were uninvolved persons. There were no fatalities reported involving police officers.
- 808 pursuits resulted in a total of 1,052 crashes (more than one crash may occur during a single pursuit), with 296 of the pursuits resulting in injury to 332 individuals, including the violator, police, and/or uninvolved persons.
- 58.96% of pursuits resulted in the arrest of one or more persons. 58.03% of the pursuits were accomplished using a trailing pursuit, the least forceful technique.

PENNSYLVANIA POLICE PURSUIT ANNUAL REPORT

Pennsylvania Consolidated Statutes, Title 75, and the Pennsylvania Vehicle Code, §6341–§6345, require police agencies within the Commonwealth to make a record of all motor vehicle pursuits and to report this data to the Pennsylvania State Police (PSP). The PSP is required to collect these reports, analyze the data, and compile and publish an annual summary of the findings.

The purpose of the detailed analysis contained within the Pennsylvania Police Pursuit Annual Report is to help identify both positive and negative factors influencing the outcome of vehicular pursuits, validate or refute the merits of pursuit policies and apprehension techniques, and recognize training successes and deficiencies. The analysis of pursuit statistics enhances the safety of police officers and the public they serve.

The information contained in this report is broken down into three major sections:

- 📖 Pursuit Factor Analysis
- 📖 Five-Year Trend Analysis
- 📖 Cross-Tabulation Analysis

Pursuit Factor Analysis examines the dynamics involved before, during, and after a pursuit was initiated by police. Pursuit Factor Analysis considers variables such as the reasons pursuits were initiated, the types of vehicles pursued, the tactics utilized by police during pursuits, and the reasons pursuits were terminated. Some other pursuit-related aspects analyzed in this section are pursuit-related crashes, injuries, fatalities, and property damage. A summary of Pursuit Factor Analysis is found within this report. Previous year comparison Pursuit Factor Analysis data can be found in Appendix A.

Five-Year Trend Analysis examines pursuit trends over the past five years in five major pursuit factor categories (i.e., total number of pursuits, apprehension rates, crash rates, total number of fatalities, and total number of injured persons). By examining these trends, officials can better identify and address successes and deficiencies in pursuit techniques and policies. A Five-Year Trend Analysis can be found in Appendix B.

Cross-Tabulation Analysis breaks down pursuit factor data in relation to one another, providing greater insight into the dynamics of police pursuits. For example, Reason Initiated – Crash Cross-Tabulation Analysis examines the likelihood of pursuit-related crashes based upon the reasons pursuits were initiated. The results of this analysis can reveal valuable information concerning the likelihood of a crash occurring in relation to the reason a pursuit was first initiated (e.g., traffic violation, driving under the influence, stolen vehicle, felony criminal activity). Officials can utilize the results of the Cross-Tabulation Analysis to identify problem areas and make the necessary changes to pursuit policies, training, and techniques. A summary of the Cross-Tabulation Analysis is found within this report. Further details of the Cross-Tabulation Analysis can be found in Appendix C.

A list of Pennsylvania law enforcement agencies who have not notified or certified to the Municipal Police Officers' Education and Training Commission that they have a pursuit policy can be found in Appendix D.

Detailed definitions of terminology contained in this report can be found in Appendix E.

PURSUIT FACTOR ANALYSIS

Pursuit factors listed in this section were compiled and analyzed from data obtained from the Pennsylvania Police Pursuit Reporting System. These factors were comprehensively analyzed by combining pursuit reports from municipal police departments and the PSP.

Due to the lack of a national pursuit database, and because law enforcement agencies maintain different reporting procedures, there is little comparative information available for use in conducting extensive analytical research on this subject.

Pursuit factor data for calendar year 2024 is provided below. Previous-year data is provided for comparison in Appendix A. A Five-Year Trend Analysis is contained in Appendix B.

Reason Initiated:

The most common reason for a pursuit to be initiated was for other traffic offenses, such as exceeding the maximum speed limit, stop sign and yield sign violations, etc. (Appendix A, Fig. 1). These factors accounted for 51.87% of all pursuits.

Felony criminal offenses were the second highest cause, accounting for 13.41% of initiated pursuits, while 11.77% of pursuits originated due to stolen or suspected stolen vehicles (Appendix A, Fig. 1).

Apprehension:

This pursuit factor was designed to identify the number and percentage of pursuits that resulted in a violator's apprehension. Furthermore, if a violator was not apprehended, this factor serves to identify why an apprehension did not occur. Nearly half of the pursuits (46.66%) ended with an apprehension during the pursuit. In addition, 12.75% of pursuits resulted in a delayed apprehension. By combining "during" and "delayed" apprehensions, approximately 59.41% of all pursuits resulted in an apprehension (Appendix A, Fig. 2).

Reason Terminated:

This pursuit factor categorizes the reasons pursuits were terminated or what factors caused a pursuit to end.

Of the 2,863 pursuits, 44.88% were discontinued by the police. Pursuits were discontinued for a number of reasons, including officer/supervisor decision to end the pursuit, the violator eluded the police, etc. (Appendix A, Fig. 3).

20.82% of pursuits were ended because the violator stopped voluntarily. Stopped by collision accounted for 12.78% of all pursuit terminations (Appendix A, Fig. 3).

Crash Type:

71.78% of the reported pursuits ended without a collision. Of the 2,863 total pursuits, 808 resulted in a total of 1,052 crashes. The following is a breakdown of the types of crashes that were reported (Appendix A, Fig. 4). More than one crash may occur during a single pursuit.

Violator Crash: 508
Police/Violator Legal Intervention: 150
Violator/Uninvolved Occupied Crash: 103
Violator/Police Crash: 78
Violator/Uninvolved Unoccupied Crash: 54
Police Crash: 52
Violator/Police Deliberate Intent: 42
Uninvolved Crash: 30
Uninvolved/Police Crash: 12
Violator/Tire Deflation Deployment Crash: 11
Violator/Uninvolved Deliberate Intent: 7
Police/Tire Deflation Deployment Crash: 3
Uninvolved/Tire Deflation Deployment Crash: 2

Ending Apprehension:

This pursuit factor measures what apprehension techniques police utilized to end each pursuit. Over half (58.03%) of all pursuits ended as a result of a trailing pursuit. Pursuit data analysis reveals that police utilized minimum or no force in the majority of pursuits (Appendix A, Fig. 5).

Violators Arrested:

The majority of pursuits ended with the arrest of the fleeing violator. Of the reported pursuits, 49.81% involved the arrest of one violator, while 9.15% involved the arrest of multiple persons (Appendix A, Fig. 6).

Type of Police Vehicle:

The majority of pursuits (87.11%) involved only marked police vehicles; 6.46% involved only unmarked police vehicles; and 6.43% involved a combination of marked and unmarked vehicles (Appendix A, Fig. 7).

Type of Vehicle Pursued:

Pursuit analysis indicates that 55.61% of police pursuits involved automobiles; 25.15% involved vans, pick-ups, or sport-utility vehicles; and 14.43% involved motorcycles (Appendix A, Fig. 8).

Number of Injuries:

Of the 2,863 initiated pursuits, 296, or 10.34%, resulted in injuries to 332 persons (more than one injury can occur in a single pursuit). Of the 332 injured persons, 230 were violators, 56 were police officers, and 46 were uninvolved persons (Appendix A, Fig. 9).

Number of Fatalities:

There were 16 deaths that occurred during police pursuits in 2024. A breakdown of the fatalities is as follows: twelve violator deaths, four uninvolved person deaths, and zero police deaths (Appendix A, Fig. 10).

Property Damage:

Violators incurred an average of \$910.69 in property damage per pursuit; police incurred an average of \$381.55 in damage per pursuit; and uninvolved persons incurred an average of \$723.50 in property damage per pursuit (Appendix A, Fig. 11).

Non-pursuit-Related Offenses:

Non-pursuit-related offenses represent those violations which did not occur during the pursuit but occurred prior to the encounter, during initiation, or at the apprehension stage of the pursuit. The total reported non-pursuit-related Vehicle Code violations was 1,256; the total reported non-pursuit-related Crimes Code violations was 737; and the total reported non-pursuit-related controlled substance offenses was 535 (Appendix A, Fig. 12).

FIVE-YEAR TREND ANALYSIS

Five-Year Trend Analysis examines pursuit trends over the past five years in five key pursuit factor categories (i.e., total number of pursuits, apprehension rates, crash rates, total number of fatalities, and total number of injuries). By examining pursuit trends, officials can better identify and address successes and deficiencies in pursuit techniques and policies. A Five-Year Trend Analysis can be found in Appendix B.

CROSS-TABULATION ANALYSIS

This section analyzes pursuit factors in relation to one another, providing greater insight into the dynamics of police pursuits. This analysis can be found in Appendix C.

Apprehension – Type of Vehicle Pursued:

Most fleeing violators/vehicles are apprehended during police pursuits. Apprehension rates, consisting of "during" and "delayed" apprehensions for the different types of vehicles pursued, were as follows in 2024: automobiles 60.24%; motorcycles 43.58%; vans/pick-ups/sport-utility vehicles 67.92%; other vehicles (example: all-terrain vehicles) 52.21%; and truck-tractor/semitrailers 100.00% (Appendix C, Fig. 19).

Crash – Type of Vehicle Pursued:

The majority of reported pursuits (71.78%) did not involve collisions. 70.23% of pursued automobiles, 84.26% of pursued motorcycles, and 65.28% of pursued vans/pick-ups/sport-utility vehicles were not involved in crashes (Appendix C, Fig. 20).

Reason Terminated – Type of Vehicle Pursued:

Overall, 44.88% of police pursuits were discontinued by the officer(s) involved. In analyzing the discontinued pursuits in comparison to the total pursuits for each vehicle type, it was discovered that pursuits involving motorcycles had the highest percentage (60.77%) of discontinuations (Appendix C, Fig. 21).

Reason Initiated – Apprehension:

Pursuits initiated because of a DUI or suspected DUI operator resulted in an apprehension 84.79% of the time. Apprehension rates for pursuits initiated for felony criminal offenses, misdemeanor criminal offenses, traffic violations, stolen or suspected stolen vehicles, and summary criminal offenses ranged from 49.26% to 64.32% (Appendix C, Fig. 22).

Reason Initiated – Crash:

This comparison examines the likelihood of pursuit-related crashes based upon the reasons pursuits were initiated. The following "reason initiated" categories had the following prevalence of crashes in 2024: DUI or suspected DUI operator, 34.63%; felony criminal offenses, 41.93%; misdemeanor criminal offenses, 21.65%; other traffic offenses, 22.96%; stolen or suspected stolen vehicles, 38.28%; and summary criminal offenses, 18.18% (Appendix C, Fig. 23).

Reason Initiated – Termination:

Pursuits initiated for 'other traffic offenses' accounted for the highest percentage (56.96%) of discontinued pursuits, whereas 'summary criminal offenses' resulted in the lowest percentage (6.30%) of discontinued pursuits. Pursuits initiated for 'other traffic offenses' also accounted for the greatest percentage (54.03%) of pursuits where the violator stopped voluntarily (Appendix C, Fig. 24).

CONCLUSION

Few areas of police work raise as much public scrutiny as police pursuits. The basic dilemma associated with high-speed police pursuits of fleeing individuals is deciding whether the benefits of potential apprehension outweigh the risks to police officers, the public, and the violator(s).

The detailed analysis in this report can be used to help identify both positive and negative factors influencing the outcome of vehicular pursuits, validate or refute the merits of pursuit policies and apprehension techniques, and recognize training successes and deficiencies. It is intended that the statistics gathered will enable police departments throughout the Commonwealth to enhance the safety of their officers and the public they serve.

The background of the slide features a faded, light-colored version of the Seal of the Commonwealth of Massachusetts. The seal includes a central shield with a blue field containing a white sailing ship, a green field with three gold sheaves of wheat, and a yellow field with a bent arm holding a sword. Above the shield is a crest depicting a bent arm holding a broadsword. The shield is flanked by two grey horses rearing up, wearing red harnesses. A red ribbon scrolls across the bottom, bearing the Latin motto "VIRTUE LIBERTY AND INDEPENDENCE" in gold capital letters.
